

Geography

At Churchfields Primary School

Map Skills and Fieldwork

A map is always used at the start of every lesson and maps are available during lessons

We use maps and globes to locate places and compare them

We conduct fieldwork inside and outside of the classroom

Human and Physical

We learn about the difference between human and physical geography

We use our geographic vocabulary to describe features

We identify geographical features on maps and pictures

Place and Location

Each lesson starts with a map: we compare where we are in the world to the place/s we are studying and focusing on

We learn about places all over the world by focusing on a different continent in each year group in KS2

In KS1, we learn about our local area of Chesterton and our place in the UK

We learn about the similarities and differences between places based on human and physical geography
